**Dust Cover
Push On (pages 1-2 of 4)**

Dust Covers protect the lock cylinder and key from adverse environmental conditions such as moisture, dirt, and sleet. The Dust Covers also protect the key from accidental damage. We highly recommend dust covers for outdoor installations.

Push On (Part # 234729501)

The Push On Dust Cover can be placed over the lock cylinder when the key is in the held position or removed. One end of the dust cover chain is attached to the top of the dust cover and serves to retain the cover when removed. The other end has a mounting ring, which is secured under a mounting bolt head.

On a multi-cylinder interlock, all of the Push On Dust Covers are tethered together and secured with a single mounting ring for your convenience.

To order the Push On Dust Cover put the letter "C" in the appropriate column of the interlock part number. Reference the SD Series Ordering Guide.

The Push On Dust Cover is made from stainless steel.

**Dust Cover
Flip Open (pages 3-4 of 4)**

Dust Covers protect the lock cylinder and key from adverse environmental conditions such as moisture, dirt, and sleet. The Dust Covers also protect the key from accidental damage. We highly recommend dust covers for outdoor installations.

Flip Open (Part # FC501)

The Flip Open Dust Cover is hinged and is held closed with spring tension. It is designed to protect the lock cylinder and key regardless of the position of the key. The Flip Open Dust Cover is attached to the lock cylinder with a stainless steel set screw.

To order the Flip Open Dust Cover put the letter "F" in the appropriate column of the interlock part number. Reference the SD Series Ordering Guide.

The Flip Open Dust Cover is made from stainless steel.
