Type NLTU - Nonlinear Transfer Unit

The Nonlinear Transfer Unit is designed for use when nonlinear key interlock operational sequences are required. The selector knob on the right hand end of the unit can be set-up during manufacturing to suit specific operational requirements, only releasing keys as needed in a set sequence. The number of key entries, key releases, and sequence steps can be specified to suit individual applications. The Nonlinear Transfer Unit can be built with up to 8 sequence steps. The unit is housed in aluminum.

OPTIONS

- Multi-Cylinder – up to 8 cylinders available.
- Protective Covers – see SD Series Data Sheet for Protective Covers (3.1) for details.
