Type NT - Flat Narrow Top Mounted

The Type NT interlock is similar in design to the Type F interlock. However, the Type NT housing is more narrow and is intended to be flat, or face mounted with 1/4" bolts through the front of the housing. It is ideal for applications where a smaller interlock or smaller mounting bolts are required for additional clearance (e.g. the front of a panelboard containing molded case circuit breakers).

The interlock housing is made from brass. The locking bolt is made of 5/8" diameter stainless steel. The throw, or travel, of the locking bolt is 3/4".

OPTIONS

- Locking Bolt Length - when ordering, specify the length of the locking bolt in the withdrawn position. Standard lengths are 1/4", 3/8", 1/2", 3/4", 1", 2", and 3". Non-standard lengths are also available. (1" Lock Bolt shown on drawing)
- Key Removable - the key(s) is removable when the locking bolt is either in the extended (E) or withdrawn (W) position. Please choose E or W when ordering an interlock. Key removable extended is the most common because the locking bolt is typically extended to block/engage something.
- Multi-Cylinder - up to 2 cylinders available. Designate "E" or "W" key removable position for each cylinder.
- Stamp Key Interchange - specify an alphanumeric code to be stamped on the cylinder face and the key (e.g. A1, A2, B1, etc. - up to 5 characters). See SD Series Data Sheet for Keys (3.4) and Terminology (4.1) for details.
- Protective Covers - see SD Series Data Sheet for Protective Covers (3.1) for details.
- Mounting Bolts - see SD Series Data Sheet for Mounting Bolts (3.2) for details.
- "Opposite Hand" - see SD Series Data Sheet for Terminology (4.1) for details.
